Freading on an Kindle Fire*

**other versions of the Kindle are not supported at this time*

It takes a few extra steps to get the Freading application on the Kindle Fire, but once it is set up, most users report that it is easy to use. (Please note: on some versions of the Kindle Fire users are warned that loading applications this way is less private and there is a risk of "unexpected behavior".) If you receive this warning, go to the **settings** on the Kindle Fire (it is the bicycle gear icon at the top) and go to "**device**". Turn on the switch for **allowing unknown applications**.

<input type="checkbox"/>	1. Before you begin, if you do not already have an Adobe ID , register for one at: www.adobe.com . Go to Sign In , and click on " Don't have an Adobe ID? " NOTE: Be sure to write down and save your Adobe ID and password you may need it again to authenticate other devices.
	2. Go to the browser on your Kindle Fire and type in http://slideme.org/
<input type="checkbox"/>	3. Search for and download the Freading app .
<input type="checkbox"/>	4. A little number icon will appear in a circle next to the name of the Kindle at the top of the display when the download is complete. Tap the number and follow the on screen instructions to install it.
<input type="checkbox"/>	5. The Freading app will show up on the home page of the Kindle Fire now. The first time you turn the Kindle off after the install, you may need to press the sync/refresh button , which is in the first menu after pressing the settings gear icon.
<input type="checkbox"/>	6. Use Freading through the Freading app , by tapping the ' store ' icon.
